ACTIVE DIAGNOSES

| ICD-10 Code | Description                                         | Onset    | Status |
|-------------|-----------------------------------------------------|----------|--------|
| E11.9       | Type 2 Diabetes Mellitus, without complications     | Jan 2020 | Active |
| E11.65      | Type 2 DM with hyperglycemia                        | Mar 2023 | Active |
| Z79.4       | Long-term use of insulin / oral hypoglycemic agents | Jan 2020 | Active |
| I10         | Essential (primary) hypertension                    | Sep 2021 | Active |

RECENT LAB RESULTS

| Test            | Result           | Reference Range | Date       | Flag   |
|-----------------|------------------|-----------------|------------|--------|
| HbA1c           | 8.9%             | < 7.0%          | 05/10/2025 | HIGH ▲ |
| Fasting Glucose | 187 mg/dL        | 70–99 mg/dL     | 05/10/2025 | HIGH ▲ |
| eGFR            | 72 mL/min/1.73m2 | > 60            | 05/10/2025 | Normal |
| LDL Cholesterol | 118 mg/dL        | < 100 mg/dL     | 05/10/2025 | HIGH ▲ |
| Blood Pressure  | 138/86 mmHg      | < 130/80 mmHg   | 05/22/2025 | HIGH ▲ |

CURRENT MEDICATIONS

| Medication    | Dose    | Frequency           | Duration  | Prescriber     |
|---------------|---------|---------------------|-----------|----------------|
| Metformin HCl | 1000 mg | Twice daily (BID)   | 18 months | Dr. Emily Chen |
| Lisinopril    | 10 mg   | Once daily          | 3 years   | Dr. Emily Chen |
| Atorvastatin  | 20 mg   | Once daily at night | 2 years   | Dr. Emily Chen |

## CLINICAL NOTES — Office Visit 05/22/2025

---

**Subjective:** Patient presents for 3-month follow-up. Reports compliance with Metformin 1000mg BID and dietary modifications. Denies skipped doses. Ongoing fatigue, increased thirst, and frequent urination despite adherence. No episodes of hypoglycemia. Weight stable at 172 lbs.

**Objective:** BP 138/86 mmHg. HR 76 bpm. Weight 172 lbs. BMI 28.4. HbA1c: 8.9% (up from 8.4% in Feb 2025). Fasting glucose: 187 mg/dL. eGFR: 72 — no contraindication to new agents.

**Assessment:** Type 2 Diabetes Mellitus — UNCONTROLLED despite 18 months of first-line therapy. HbA1c trending upward. Previous therapies: Metformin 1000mg BID x 18 months, structured dietary counseling x 12 months. Inadequate response to current regimen.

**Plan:** Initiate Ozempic (semaglutide) 0.25mg SQ once weekly x 4 weeks, then escalate to 0.5mg once weekly. Prior authorization required per HealthFirst PPO formulary. PA to be submitted. Patient counseled on injection technique and hypoglycemia risk. Follow-up in 8 weeks.
